## Features

- Push button calling
- Concise instructions
- Lighted Status indicators
- Hands-free communications
- Fits a standard 3 gang switchbox

AV-Call Station

## General Description

Used with the ARA-Series, the AV-Call Station provides reliable, two-way, hands free communication for people requiring assistance. The unit is constructed of flame retardant ABS plastic with a textured off-white finish. The unit mounts on a standard three gang switch box. Instructions are printed on the front of the unit. Connections are color-coded and require only a few wire nuts to complete.

## Operation

A request for help is made by pressing the CALL pushbutton. A Yellow Indicator is provided for call-placed and a Red indicator for call-received. Once the call is placed, the user does not have to push any buttons to talk, or to listen. This is an important feature in emergency situations.
